

Please cancel claim 46.

Please add the following new claims:

¹³~~50~~. (new) A method according to claim ~~27~~¹³, wherein the therapeutic agent is selected from the group consisting of mechlorethamine, procarbazine, prednisone, dacarbazine, a nitrogen mustard, an intercalating agent, an antimetabolite, a radionuclide, a vinca alkaloid, an antibiotic and a toxin.

¹⁴~~51~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is a nitrogen mustard, and the nitrogen mustard is selected from the group consisting of L-phenylalanine nitrogen mustard and cyclophosphamide.

¹⁵~~52~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is an intercalating agent.

¹⁶~~53~~. (new) A method according to claim ~~52~~¹⁵, wherein the intercalating agent is cis-diaminodichloroplatinum.

¹⁷~~54~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is an antimetabolite.

¹⁸~~55~~. (new) A method according to claim ~~54~~¹⁷, wherein the antimetabolite is 5-fluorouracil.

¹⁹~~56~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is a vinca alkaloid.

²⁰~~57~~. (new) A method according to claim ~~56~~¹⁹, wherein the vinca alkaloid is vincristine or vinblastine.

²¹~~58~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is an antibiotic.

²²~~59~~. (new) A method according to claim ~~58~~²¹, wherein the antibiotic is selected from the group consisting of calicheamycin, bleomycin, doxorubicin and daunorubicin.

²³~~60~~. (new) A method according to claim ~~59~~²², wherein the antibiotic is calicheamycin.

²⁴~~61~~. (new) A method according to claim ~~50~~¹³, wherein the therapeutic agent is a toxin.
